HMS Academy Science of Learning Interest Group

Article discussion

David Topor, Ph.D., MS-HPeD., VA Boston Healthcare System

4 questions:

1. Identify one important concept, research finding, theory, or idea in medicine/healthcare that you learned while completing this activity.
2. Why do you believe that this concept, research finding, theory, or idea in medicine/healthcare is important?
3. Apply what you have learned from this activity to some aspect of your life.
4. What question(s) has the activity raised for you? What are you still wondering about?

Discussion Activities:

1. Think of a recent class you taught, lecture you gave, or teaching rounds you ran, and respond to the 4 questions above, as if you were a learner in that setting.

   Think about the process of answering these questions. How do they augment your learning of the material?

2. Think about the core concepts the 4 questions address: a) analyzing the material b) reflecting on the material c) relating the material to an aspect of your personal life d) generating at least one question about it that was unanswered by the activity.

   What are other creative learning activities that can address these concepts? For example, could role play address these concepts?
