Print Client Installation – Mac OS 10.6

** You must be connected to the HMS Private Wireless Network to successfully install the Print Limit Pro client. For instructions on how to connect to HMS Private, please see our documentation.

1. In the Finder, locate the toolbar at the top of the screen. Select Go > Connect to Server.

   ![Connect to Server screenshot]

   For Server Address, enter the following: `smb://itwvprtp01.med.harvard.edu/pcclient`

2. You will be prompted to enter your credentials. Enter your MyCourses username and case-sensitive password and click OK.
Once you have successfully connected to the server, double-click on the folder titled **Mac**.
Next, double-click on the `client-local-install` script.

When prompted, click Yes to install the client to your Applications folder.

Once the installation is complete, The Print Limit Pro Application will prompt you for your MyCourses username and case-sensitive password. Enter these into the appropriate fields and click OK.

You have now successfully installed the Print Limit Pro client on your computer. Please note that this application must be running in order to successfully print on the HMS Wireless network.
